DIV. OF HAZARDOUS MATERIAL
AND WASTE

Attached is the invoice from Payne Electric for services rendered on the treatment system at the Valley of the Drums. Please note the following:

1. The motor which runs the blower system was removed to be repaired (see memorandum dated December 12, 1980). To my understanding, the motor was completely overhauled (replacing: "shot bearings", new capacitors, etc.). This repair was necessary to ensure continued performance by the entire system.
2. Materials (nuts and bolts) were purchased during the installation of the motor.

Because of Payne Electric's "quick response" to this subject matter, I feel our Division should respond equally to this invoice.
